Qualifications & credentials

At Yaham, we strive to satisfy our customer's needs as they define them and achieve their expectations while delivering value. This is accomplished by using ISO9001: 2008 registered and carrying out CE, UL, ETL and FCC standards to coordinate activities that direct and control the performance of our company and products. Yaham is committed to providing the highest quality products and services. A culture of quality is established by continuously seeking the highest levels of customer satisfaction.

CCC FCC ETL UL CE RoHS

Quality control

R & D

Yaham owns a professional and award-winning design team to deliver any of our customer's idea to live. Yaham has always been a design-driven company and has won a well-deserved reputation, especially in terms of customized projects. It is our passion to continuously reinvent the way of display by our constantly upgraded led display technology.

Production

As a industry-leading manufacture of LED display, Yaham owns completed, highly automated and state of the art production lines specifically for fine pixel pitch LED display, sports LED display and standard LED displays. In 2015, Yaham founded its own laboratory where can simulates UL, CE, ETL tests for all our LED products in a way to further improve product stability.

Material

As a company targeting at the high-end market, apart from our commitment that all our raw materials are ordered from reputable suppliers who hold quality accreditation under International Standards organization (ISO) or similar standards, Yaham also established a stringent and full-scale inspection standards to control material quality.

Partner

At Yaham, we don't view you as simply as a client, we believe your business success is our success too and we desire for you to go as far as you can image, for that reason, it is our responsibility to provide you with the best displays that work, both now and in the future.

02

Featured Installations

In these cases , yaham has applied products of L0 series 、 S series、 FC series and CH series , which owns it's characteristics.

L0 series

OUTDOOR MESH LED DISPLAY

Features of L0 series are High Transparency、 Lower wind-load、 Ultra light cabinet、 Protection grade IP65 and so on. Rigid LED Mesh displays, also known as LED curtain displays extend the installation opportunities due to the unique qualities of the product - applications include, but are not limited to, commercial glazed facades, retail atriums and roof mounted projects.

S series

STANDARD INDOOR/OUTDOOR LED DISPLAY

Features of S series are Flexible in shape、 Robust Build Quality 、 24/7 smart monitoring service、 Smart module、 Ultra light cabinet and so on. Flexible in shape, size and a variety of cabinet dimensions, Yaham standard outdoor/indoor panel is a good option when the LED installation or environment requires customization.

FC series

FLEXIBLE LED DISPLAY

Features of FC series are Flexible in shape、 24/7 smart monitoring service、 Smart module、 Curve installation 、 High contrast and so on. Yaham owns a professional and award-winning design team to deliver any of our customer's idea to live.

CH series

ARENA CENTRE HUNG LED DISPLAY

Features of FC series are Flexible in shape、 Smart module、 Ultra light cabinet 、 Seamless curve、 Slim cabinet and so on. Yaham owns a professional and award-winning design team to deliver any of our customer's idea to live. CH Series benefits from slim and lightweight cabinets, delivering exhilarating real-time broadcasting, replays, scores, close-ups, sponsor branding and advertising. Yaham has many years of expertise engineering customised displays and supporting architecture to stretch the imagination and encourage creative content.

Address: Metro City, Shanghai L0 series Pixel pitch: 80/210mm Size: 2700 sq.m 2013

Metro City, Shanghai

Metro City has been well-known in the architectural world for its unique exterior design, and has successfully won two awards, "White Magnolia" and "Luban Award". In 2013, Yaham built the world's first large-scale glass spherical building with LED displays. The screen project, the combination of the highly creative architecture and the outstanding display effect of the LED display provides a brand-new space for advertising creation, and obtains far-than-expected advertising benefits for many international brands.

Address: Yagan Square, Perth
L0 series Pixel pitch: 15.625mm Size: 413 sq.m 2017

Yagan Square, Perth

Located at Yagan Square in Perth, it is a 360° seamlessly spliced outdoor high-definition cylindrical screen with a ventilated and light-permeable cabinet, which realizes the perfect integration of technology and nature without affecting the lighting and ventilation of the building. In the evening, in the afterglow of the setting sun, the audience can watch the gorgeous scene of natural light passing through the screen and blending with the display light. The 45-meter-high cylindrical display screen broadcasts the latest local tourism and sightseeing 24 hours a day, attracting more tourists from all over the world.

Palms Hotel, Las Vegas

Based on customer requirements, the screen adopts a new customized large-size cabinet with a width of 1.6 meters. The display must fit the building wall perfectly, which undoubtedly increases the difficulty of R&D and production. In order to meet the needs of customers, Yaham uses outdoor arc-shaped cabinets which can completely and seamlessly cover the building surface. The air-permeable and opaque grid screen allows the display to achieve the perfect integration of function and beauty without compromising the lighting and ventilation of the building.

Address: Palms Hotel, Las Vegas L0 series Pixel pitch: 25mm Size: 1987.2 sq.m 2019

World Resort, Las Vegas

Resort World Hotel is the largest investment hotel in Las Vegas currently under construction and planned to open in 2021. It is also the largest Asian themed hotel in Las Vegas. It was designed by American Paul Steelman Design Company with a total investment of over US\$4.3 billion... The hotel's external wall display screen is divided into two parts, consisting of the West Tower's over 9000 square meters giant display screen and the East Tower's over 1000 square meters display screen. The two display screens complement the hotel's image and will become one the the most representative symbols of Las Vegas.

Address: World Resort, Las Vegas L0 series Pixel pitch: 50mm Size: 10485 sq.m 2019

Address: Caesars Palace, S series Pixel pitch: 10mm Size: 600 sq.m 2016

Caesars Palace, Las Vegas

This is an ancient Roman style doorpost display. The combination of superb curved surface and seamless corner technology, customized to create a variety of specifications of modules, the LED display seamlessly covers all building surfaces, and the visual effects on site are stunning and shocking. Now it has become a new landmark in Las Vegas.

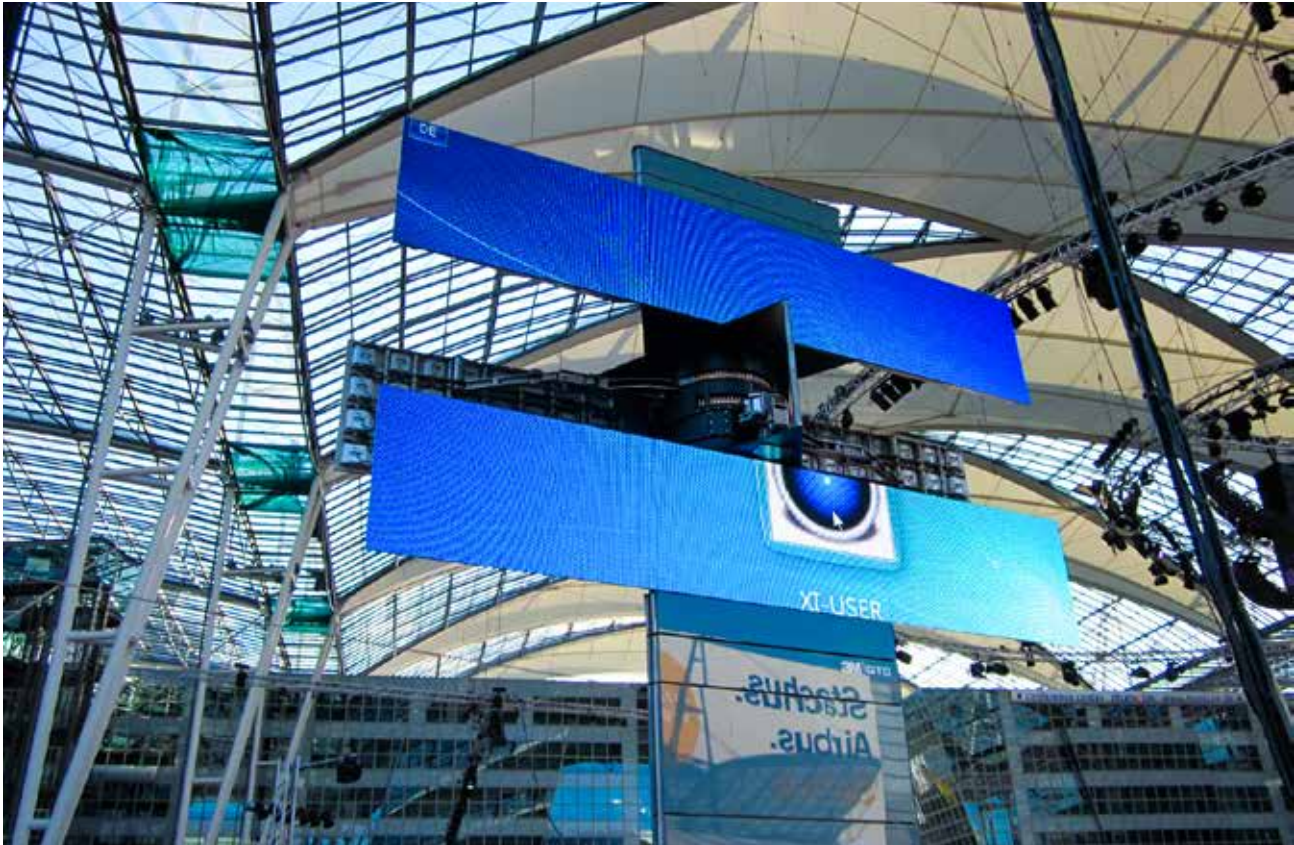

Address: Time Square, New York S series 2017

Front	Side	Logo
Pixel pitch: 12.5mm Size: 240 sq.m	Pixel pitch: 25mm Size: 31 sq.m	Pixel pitch: 12.5 mm Size: 18.75 sq.m

Time Square, New York

As long as you pass by Times Square in Manhattan, you can't help but notice this Coca-Cola display. This is a six-story digital display device composed of 1,760 independently movable LED screens, which can realize independent control of each screen, creating a stunning 3D display effect. The bag display won two Guinness World Records and is the world's first 3D mechanical structure display.

Address: Munich Airport, S series Pixel pitch: 12mm Size: 40.32 sq.m

Munich Airport, Munich

The Munich Airport mechanical display is made up of three independent LED displays. Through precise mechanical structure and program design, Yham Optoelectronics realizes the free conversion of three display screens, 360° independent rotating three-sided three-dimensional screen and other modes. Successfully attracted audiences in every direction with a very dynamic and novel posture, which greatly enhanced the attention and value of the advertisement itself.

Address: Jindingyazhi Hotel, Foshan FC series Pixel pitch: 4mm Size: 354.17sq.m 2018

Jindingyazhi Hotel, Foshan

The five-ring screen is composed of five ring screens with different diameters and twelve cylindrical screens. Each ring is divided into an outer ring and an inner ring. In order to ensure that the modules can be applied to different arcs, the entire project uses the most advanced flexible soft modules available today. Most importantly, each ring can be individually controlled and lifted up and down to present a mechanically dynamic visual experience.

Address: United Center, Chicago CHseries Pixel pitch:4mm Size: 787.4 sq.m 2018

United Center, Chicago

The overall shape is a truncated cone, which is composed of a combination of arcs, cones and conventional planes. The screen is divided into five parts. The upper and lower rings have a total area of 281.4 square meters, the inner and outer main screens have a total area of 408.8 square meters, and the special customized part of the inner ring has a total area of 97.2 square meters. The screen body is equipped with a special customized movement device, which can freely change its shape with the movement trajectory. The inner ring screen adopts a 360-degree seamless mitered round platform scheme. Its upper, small, and large opening shape ensures the maximum viewing angle for VIP seats.

Address: Wells Fargo Center, CH series Philadelphia Pixel pitch:4mm Size: 500 sq.m 2019

Wells Grago, Philadelphia

It is currently one of the most technologically advanced arena scoreboards in the world. 65% more LED screen space than the original scoreboard. In addition, it also has unprecedented transformation capabilities and multiple format configurations. It realizes multi-directional movement of the screen through two huge trusses, and presents every wonderful moment to the audience in the game in an excellent way. In the arena, when the screen is slowly dropped and opened, those shocking game pictures will push the fans' enthusiasm to a climax.

03

Outdoor Installations

There are both domestic and foreign outdoor applications, in these cases. We mainly apply outdoor LED products of S series 、 L0 series 、 G0 series.

S series

STANDARD INDOOR/OUTDOOR LED DISPLAY

Features of S series are Flexible in shape、 Robust Build Quality 、 24/7 smart monitoring service、 Smart module、 Ultra light cabinet and so on. Flexible in shape, size and a variety of cabinet dimensions, Yaham standard outdoor/indoor panel is a good option when the LED installation or environment requires customization.

L0 series

OUTDOOR MESH LED DISPLAY

Features of L0 series are High Transparency、 Lower wind-load、 Ultra light cabinet、 Protection grade IP65 and so on. Rigid LED Mesh displays, also known as LED curtain displays extend the installation opportunities due to the unique qualities of the product - applications include, but are not limited to, commercial glazed facades, retail atriums and roof mounted projects.

G0 series

OUTDOOR LOW WIND LOAD LED DISPLAY

Features of G0 series are Unmatched stability、 High-contrast、 24/7 smart monitoring service、 Whisper-quiet operation and so on. With more than 35% of the screen being hollow this effectively reduces the wind load by 32% when compared to a traditional LED billboard display. High-contrast and anti-glare module.

3052 sq.m

Shenzhen International
Exhibition
& Convention Center

Shenzhen

In Shenzhen, the city with the largest number of display companies in the world, Yaham has more than 200 large outdoor display screens that are broadcast every day in this city. It is the brand with the highest share of outdoor display screens in Shenzhen.

● Baoan Airport, Shenzhen, 16mm, 480sq.m (two sides) 2013

● Luohu port, Shenzhen, 16mm, 454 sq.m 2013

● Chiwei Building, Shenzhen, 12.5mm, 253.44sq.m 2016

● Yujing Building, Shenzhen, 16mm, 388q.m 2014

● China Unicom, Shenzhen, 25mm, 514.96sq.m 2012

● South Union Hotel, Shenzhen, 20mm, 742.4sq.m 2014

Shenzhen

This outdoor LED display located in Shenzhen Shekou Sea World brought us many difficulties in design, production and construction. Due to the irregular shape of the wide and sharp sides of the screen and the screen is tilted down as a whole, Yaham provides a variety of solutions. Yaham has specially design modules of various sizes for this purpose which the smallest is only 96mmx96mm. And also Yaham uses an all-aluminum thin and light box, cleverly matches the top steel frame structure, perfectly realizes the high precision and seamless splicing of the LED display. The Sea World is close to the sea, and it is salty and windy. The enclosure protection grade produced by Yuanheng reaches IP65, which can meet the harsh environment of the seaside. Yaham finally provided customers with satisfactory solutions.

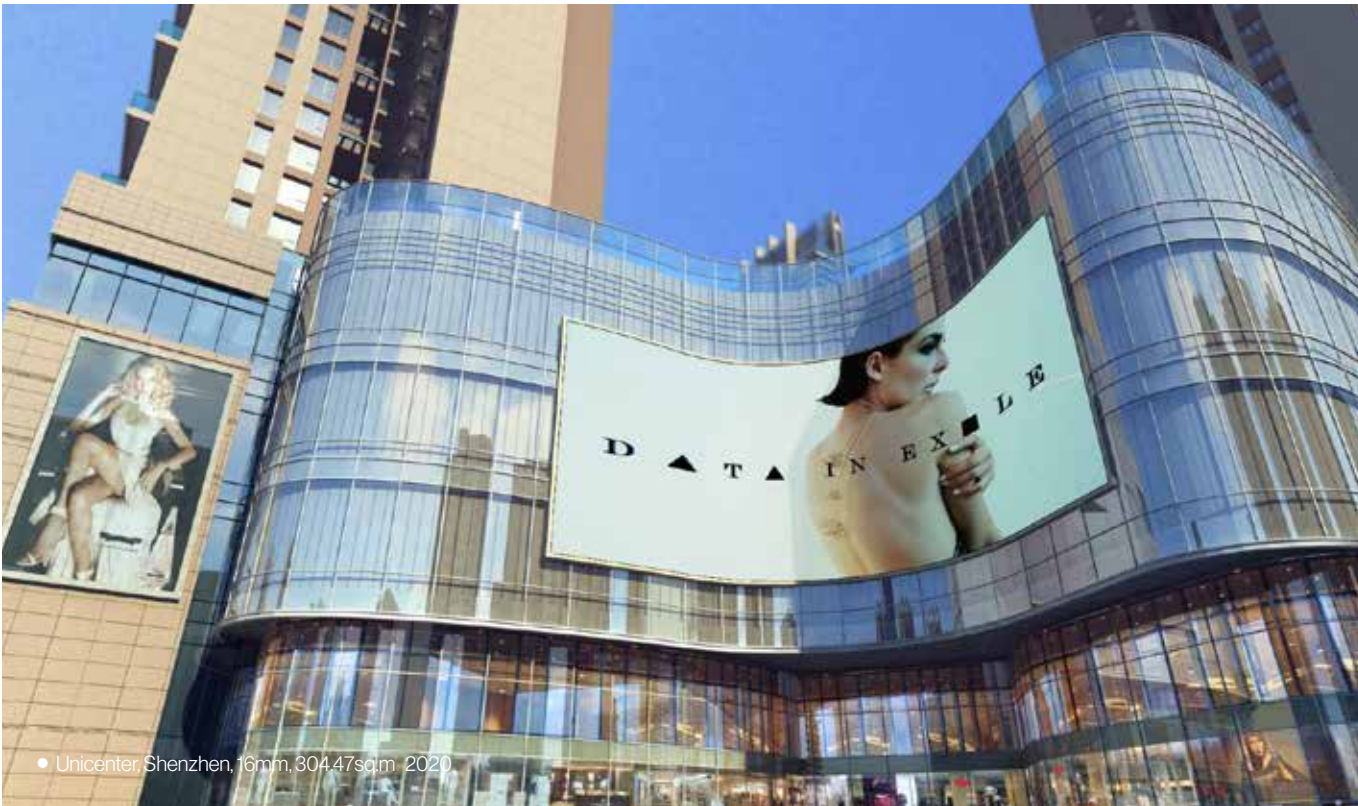

● Cloud Valley, Shenzhen, 10mm, 154.44sq.m 2014

● Unicenter, Shenzhen, 16mm, 209.2sq.m 2019

● Sea World, Shenzhen, 6mm, 120sq.m 2018

● Unicenter, Shenzhen, 16mm, 304.47sq.m 2020

● South Power, Shenzhen, 20mm, 399.36sq.m 2013

● Unicenter, Shenzhen, 10mm, 112.64sq.m 2019

Guangzhou

Project of Spring Plaza, Guangzhou completed in 2019, Yaham has built an outdoor arc-shaped LED display with a total area of 344.06 square meters. Yaham chooses S series products according to the requirements of the arc, customizes high-precision seamless splicing flat arc LED display.

Shanghai

As the world's largest and highest-spec Shanghai Huawei flagship store, chooses Yaham's outdoor S3 series products. Yaham's S3 series products adopt light and thin structure design, high protection level, intelligent module design, suitable for larger outdoor scene applications.

• Huawei Store, Shanghai, 6.25mm, 76.56sq.m 2020

• Orient Mall, Shanghai, 16mm, 301sq.m 2015

• Jindi Square, Shanghai, 10mm, 105.86sq.m 2013

• Metro City Square, Shanghai, 10mm, 143.36sq.m 2013

• Vanke Square, Shanghai, 10mm, 143.36sq.m 2016

• Meilong Square, Shanghai, 10mm, 239.6sq.m 2016

Beijing

LED Display Project of Wangjing CapitaLand , with an area of 386 square meters, is a typical outdoor curtain wall display application. Yaham chooses outdoor high-contrast S series products. The unique triple louvre design assists in delivering a perfect image with superb contrast. The status of the standard panel can be fully monitored 24/7 and will trigger alarm if any faults.(optional)

Other cities

LED Display Project of Guomao Cneter, located in the center of Dongguan in the coastal area, is quite challenging. Since the display installation position is 81 meters above the ground and the area is large, and also affected by seasonal typhoons. The display screen must be enhanced with windproof function. Yaham chose the G0 grille screen series. The G0 series adopts a hollow design with an area of more than 35%, and the wind can pass through the screen, and the wind resistance is reduced by 32%. Yaham also added an anti-diffuse mask on the module, to ensure the high contrast of the product and the clearer picture quality .

• Guomao Cneter, Dongguan, 20mm, 638.98sq.m 2018

• Guomao Center, Dongguan, 20mm, 530.84sq.m 2018

• Yingli IFC, Chongqing, 31.25mm, 834sq.m 2011

• Hainan Airport, Hainan, 16mm, 298.64sq.m 2019

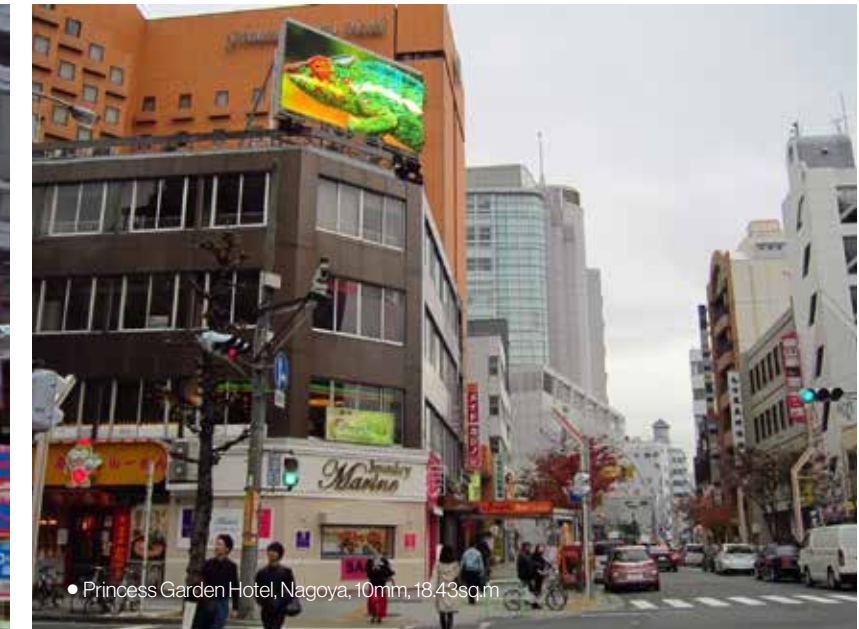

• Zhongshan Square, Chengdu 16mm, 375sq.m 2014

• Jingzai Square, Hefei, 16mm, 227.08sq.m 2012

Japan

Outdoor LED displays require stable quality in Japan's streets which are prosperous. Yaham chooses products with high-contrast black lights to meet needs.

Southeast Asia

• Chamchuri Square, Bangkok, 16mm, 808.96sq.m

• Green Hills, San Juan , 16mm, 108.7sq.m

• Goble City, Taguig , 6.67mm, 98.3sq.m

• Okada Hotel, Manila, 16mm, 454sq.m 2013

• Empire Tower, Bangkok, 16mm, 234.04sq.m 2015

Southeast Asian countries are hot and rainy all year round, which requires high protection performance and stable performance of outdoor LED displays. Outdoor LED display are often hollowed out and lightly designed, which is ventilated and opaque, reducing wind resistance and burden on the wall. The high-brightness and high-contrast outdoor LED display shows significant effects in outdoor display applications.

Australia & New Zealand

Our LED displays are mostly used at intersections with heavy traffic, in Australia and New Zealand. Special applications require our products to be reliable and stable in quality. It is also necessary to realize multi-screen network monitoring, with the function of quick response to faults. We provide satisfactory display solutions according to different locations.

North America

Yaham's products have unique design and first-class quality. Yaham Optoelectronics is the first choice for high-end top customers such as Landmark Media.

• Pennsylvania Hotel, New York, 8mm, 187.5sq.m

• Dundas Square, Toronto, 6mm, 95.12sq.m

• Time Square, New York, 16mm, 615.4sq.m

• Stratosphere Tower, Las Vegas, 10mm, 232.6sq.m

• Heartland Bank, Ohio, 25mm, 138sq.m

North America

Yaham's products have unique design and first-class quality. Yaham Optoelectronics is the first choice for high-end top customers such as Landmark Media.

04

Indoor Installations

To define creative led display, it is a kind of display created by artistic expressions, in special shapes based on pixels, lines and faces. Creative display is much more applicable to those special circumstances to give people different visual experiences, more important, it can highlight those high-end brands and help customers to understand thier brand conceptions. Lot of creative displays we have installed for many countries has made Yaham to be a expertise, as of now, Yaham has had deep cooperation with many world A-list brands, LV, Armani for instance. Yaham is committed to create the world-class creative led display and surprise our customers.

• Baoan Airport, Shenzhen, 4/6mm, 239.25sq.m

• Xinzheng Airport, Zhengzhou, 4mm, 17.28sq.m

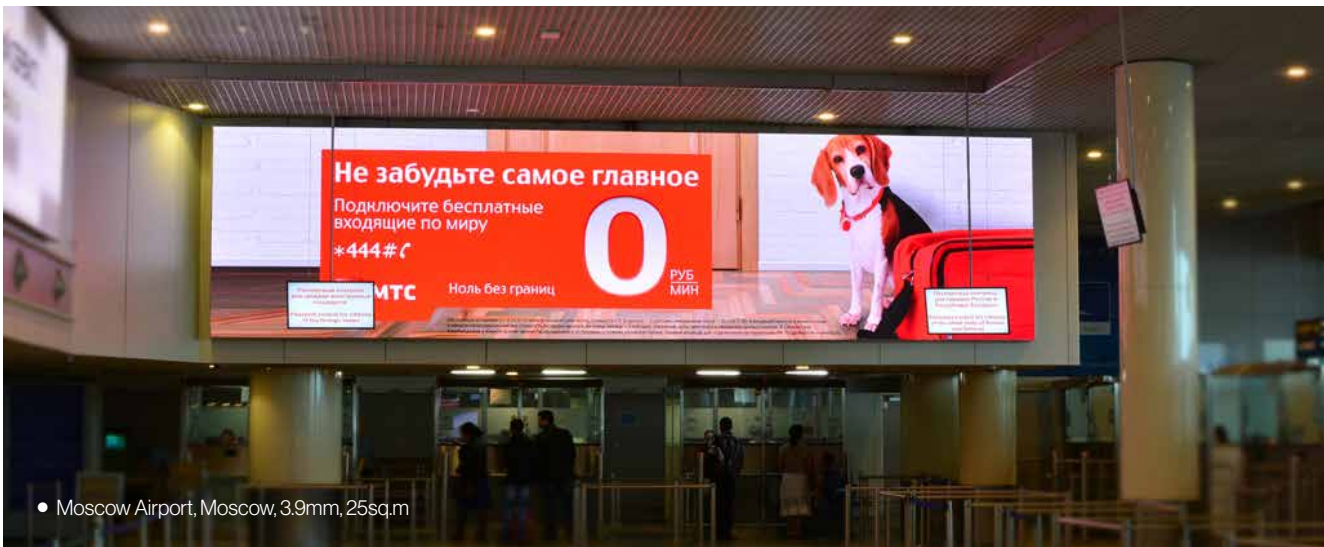

• Xinzheng Airport, Zhengzhou, 4mm, 32.14sq.m

• Xinzheng Airport, Zhengzhou, 4mm, 49.76sq.m

• Zhongchuan Airport, Lanzhou, 2.5mm, 46.77sq.m

• Moscow Airport, Moscow, 3.9mm, 25sq.m

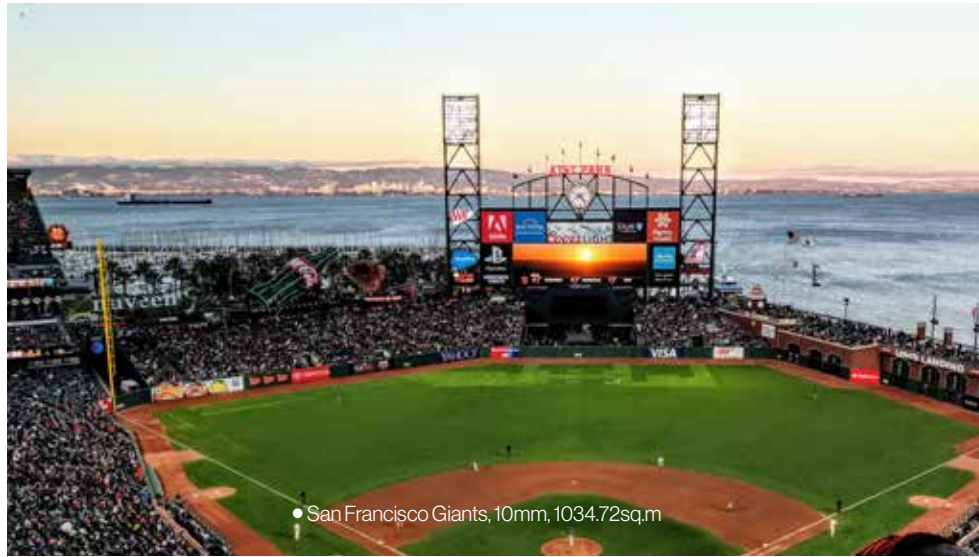

Indoor Installations

Yaham choses S2 series and CH series to complete the Shenzhen Airport "Future Tree Window" project. In this project, display of the lifting screen is 136.25 square meters using T4 pitch products, special-shaped display area of 103 square meters applies T6 pitch products. The biggest problem of the whole project is the system control and the mechanical movement of the conventional display. We have carried out a separate program editing for each box receiving card. Both ends of the displays are controlled by electric hoists, and add multiple sensors and encoders for ensuring balance of display under the conditions of large span and high wind resistance, controlling the accuracy with 10mm.

Indoor Installations

Whether it is a commercial advertisement display or a government information dispatching and publishing, LED display provides convenience for the people. Yaham has created many classic cases and provided excellent solutions. the conditions of large span and high wind resistance, controlling the accuracy with 10mm.

05

Sports Installations

Yaham has designed 4 series of led displays specifically for sports display system, including main display, center hung display, banner display, fascia display. Each series has different pixels available. It perfectly achieve all the requirements in a game, including timing, scoring, live broadcast, playback, commercial advertising and so on. The high resolution, high refresh rate, smooth image quality and exquisite color prevent the moire from being visible while it is on air. It provides a technically stable platform for the broadcasting and energize the game as well as the stadium.

Sports Installations

CH Series benefits from slim and lightweight cabinets, delivering exhilarating real-time broadcasting, replays, scores, close-ups, sponsor branding and advertising. Yaham has many years of expertise engineering customised displays and supporting architecture to stretch the imagination and encourage creative content.

06

Transparant display Installations

A new solution in Visual-Advertising, C series brings forth opportunity to Window-Advertisement in a faster and creative way. As the commercial transparent LED screen, C will keep delivering the creative advertising with its impressive features—65% of transparency and maximized displaying area with full-screen design.

Transform your ideas into reality
